Books shouldn’t be kept too close together, otherwise they interact in strange and unforeseeable ways.

“Small Gods” by Terry Pratchett p. 163
I have consistently argued all my life, while prevailing usage of scientists at a given time is the best blue for working out a serviceable system, the point of library classification is not to get together the books in their scientific relations, but “to get together the books most used together.”

Economic factors effecting salmon fisheries in Japan [mar2005]

Shimizu, I. (National Salmon Resources Center, Sapporo (Japan))

Abstract:
Salmon fisheries in Japan are facing a serious crisis and are being pressed to enact structural reforms. Though there has been a decline in high seas salmon fisheries, the total amount of salmon catches has increased year after year with a success of salmon enhancement. Salmon markets in Japan have consequently been globalized, and the price of domestic salmon in wholesale markets has dropped. In this paper, I described the fluctuation of salmon prices in the landing markets in Hokkaido in order to make clear the factors of price change, from both the short-term and long-term standpoints. Factors regarding the price formation of salmon in the wholesale market in Japan were analyzed by the econometric method. The wholesale price of fresh salmon fell when the inventory of frozen salmon or imported fresh salmon increased, and also the prices of fresh salmon have dropped when the inventory of salted salmon roe and fresh salmon increased in recent years. Since there was an increase in the amount of imported fresh salmon produced by salmon aquaculture in winter, there was an increase in the inventory of fresh salmon. In
