OPEN JOURNAL SYSTEMS
- ACTIVE JOURNALS (60)
- ALL-TIME DOWNLOADS (4,187,274)
- MEMBERS (10)
Strategies in 2017

Deliver essential preservation services as an integral component of a national digital preservation infrastructure, in order to preserve knowledge for future generations.

Enhance the access, usability, and interoperability of Texas’ digital collections by fostering connections within the digital library ecosystem.

Create meaningful and innovative professional development programs.

Leverage the expertise of Texas librarians and staff, to take advantage of their talents, develop shared standards and practices, and establish a common base of knowledge across all member institutions.

Establish a broad and enduring base of funding through statewide membership, external partnerships and funding sources, and legislative appropriation.

dtl.org
Began implementation of new Membership Structure.
New member Texas Woman’s University, and SFASU upgraded to full membership.
Hired Communications Strategist Lea DeForest to help with recruitment and communications efforts.
Launched the Texas Data Repository (TDR), on-boarded nine institutional users of the TDR, and began accepting datasets for publication.
Formed the TDR Steering Committee to help guide development of the service, and communicated a clear road map for the service. Provided on-going training opportunities related to research data management via Research Data Management Webinar Series and RDM Coursera Study Group.
TDL 2017 Accomplishments

- Hired digital preservation expert Courtney Mumma to manage DigiPres services and provide consulting and training for members. Clarified and communicated the TDL DigiPres service offering, to enable confident and effective use of the services by our members. Recruited 4 additional institutional users of TDL DigiPres services.

- Joined the Chronopolis digital preservation network, adding another non-commercial option for digital preservation storage managed by mission-driven organizations within the Academy.

- Hosted the TDL Data Symposium in Fall 2016 and the 10th Texas Conference on Digital Libraries.

- Helped establish and coordinate the South Central States Fedora Users Group and the A-Tex (Archivematica) Users Group with leadership from community members.
2017 Goals – still working

• Revamp training programs.
• Fill open positions.
• Vireo 4 release and implementation.
Recruit four additional institutional members.

Break even on Texas Conference on Digital Libraries through increased sponsorships.

Retain all current members and upgrade when possible.

Continue to transform OJS and DSpace training programs in ways that leverage member and community expertise and incentivize member participation.

Select and implement systems for better member and potential member relationship tracking, contract workflows, and documentation.

Implement tools (e.g. JIRA, Confluence) for better project tracking and increased transparency across the staff organization and the wider TDL community.

Fill vacant staff positions.
Continue DigiPres and TDR usage growth and make enhancements to these services in alignment with services roadmaps.

Upgrade all hosted services to latest versions, including TDL-hosted Vireo deployments to Vireo 4.

Achieve greater integration of existing services, with an emphasis on easing workflows to TDL preservation systems.

Explore HykuDirect hosting through a limited pilot project.

Transition expanded DPLA hub from prototype to production-ready service. Explore possible TDL role(s) for supporting open educational resources.

Re-architect TDL systems and services within Amazon Web Services (AWS) for greater security and cost-effectiveness.

Achieve greater standardization in the deployment and management of services through application of new tools and processes.
Goodbye, Ryan!

TDL staff are stepping up our responsibilities in the interim:

- Clark – day-to-day operations
- Courtney – overseeing DigiPres, TDR services, and Hydra pilot
- Tech team – hyper-vigilance of Helpdesk
- Kristi – oversight of core services (DSpace, OJS, Vireo)

Hiring a new software engineer (posting is on tdl.org)
