New Services
More Discoverable Collections
TDL's new DPLA Aggregation Service will enable Texas institutions to have their digital cultural heritage collections discoverable in the Digital Public Library of America (DPLA). Through TxDub, TDL aggregates metadata from collections in DSpace and other repositories in Texas to become discoverable through dpl.a.

Open Educational Resources (OER)
TDL launched our first ever OER Support Service in Fall 2019. This service includes the OER Ambassadors program, Open Texas, an annual OER conference, an Open Education Network (formerly named the Open Textbook Network) membership, and a discount program with Pressbooks.

Service Upgrades & Updates
With the help of our members, our services saw major improvements in 2019-2020:
• Our Open Academic Journals took a major leap forward with OJS version 3, both in “look and feel” and functionality as well as big changes to the user interface.
• TDL upgraded our ETD Management service to Vireo 4, improving submission workflows, controlled vocabularies, metadata, and enhanced reporting.
• Our Research Data Management service, the Texas Data Repository, saw major improvements including capacity for larger datasets, a preservation protocol in Chronopolis, and project management in the steering committee.

New Strategic Plan
In summer 2020, TDL developed a new Strategic Plan for the Texas Digital Library consortium with four overarching strategies to guide our work over the next three years.

These strategies are:
1. Partner with members and like-minded external partners to broaden access to scholarly, cultural heritage, and education materials.
2. Create value for members through shared resources.
3. Commit to diversity, equity, inclusiveness, and accessibility in order to ensure broad and equitable access to our tools, content, and communities.
4. Strengthen sustainability through membership growth and diversification of funding sources.

You can read the full Strategic Plan on our website at tdl.org/strategic-plan.
