Let’s be better

Inclusive Design and Architectures
We are not “qualified” for this yet.
Our data descriptions are inherently coded with institutional racism.
Coding language includes racist and xenophobic terminology

“sanitization” “master/slave”
Machine Learning and AI can amplify existing inequalities
Professionalism is exclusionary

Pedigree exacerbates this problem
What can we do better?
Challenge Assumptions
Participatory Design
But let’s work on this
Educate Ourselves
